SUMMARY

Full Stack Developer with hands-on experience building and maintaining production web and mobile applications using **React, Next.js, and Node.js**. Contributed to multiple live products at DRX across frontend, backend services, CMS admin dashboards, and API documentation. Experienced in REST APIs, SQL/NoSQL databases, audit logging, and deploying applications to **AWS and Vercel**.

EXPERIENCE

PT. Berkas Indah Garment (DRX)

September – Present

Full-Stack Developer

Contributed to multiple production systems across **three active DRX products**, working across frontend features, backend services, CMS admin dashboards, and API documentation within existing architectures.

DRX Token

- Developed and maintained **Landing Page frontend, CMS Admin Dashboard**, and backend APIs supporting blogs, events, and marketing content.
- Built SEO-optimized frontend using **Next.js, Tailwind CSS, shadcn-ui**, including dynamic metadata, Open Graph, and **JSON-LD structured data**.
- Implemented scalable backend services with **NestJS, Prisma, PostgreSQL**, supporting content lifecycle and admin workflows.
- Created **Swagger API documentation** for all backend endpoints to improve maintainability and cross-team collaboration.

DRX Wear

- Developed **frontend website, backend services**, and **CMS Admin Dashboard** for product and content management.
- Converted **Figma UI/UX designs** into a fully responsive production website using **Next.js and Tailwind CSS**.
- Developed modular schemas and reusable services to support product data, content updates, and admin operations.
- Documented backend APIs using Swagger to streamline frontend integration.

DRX Sportnet

- Developed backend services and **CMS Admin Dashboard frontend** within an existing system architecture.
- Designed and implemented a full **Audit Trail system** using **HonoJS**, tracking critical admin and system actions.
- Built audit trail capabilities including **filtering, search, and structured log indexing** to support traceability and operational audits.
- Wired audit trail data end-to-end into the **CMS Admin Dashboard**, allowing admins to inspect historical actions directly from the UI.
- Produced comprehensive **Swagger (OpenAPI) documentation** covering core services and audit trail endpoints.

Key Achievements

- Delivered a **multi-product ecosystem** (Token, Wear, Sportnets) with shared standards across

frontend, backend, and CMS.

- Established consistent **Swagger-based API documentation** across all backends, improving developer onboarding and integration speed.
- Implemented **audit logging & monitoring** features to improve system transparency and admin control.
- Improved SEO validation and rich-result coverage through automated metadata and structured-data generation.
- Enhanced frontend performance, accessibility, and maintainability across all DRX platforms.

Hallo Hukum

April – July 2025 (Contract, Completed)

Frontend Developer

- Converted wireframes into responsive UIs for two React Native (Expo) apps (client & lawyer).
- Integrated Stream real-time chat + voice/video and auth flows, shipped a stable release with 0 blocking issues.
- Optimized rendering and state management, improving UI responsiveness by 25% across devices.
- Implemented JWT/OAuth access control and session management, securing 100% of protected features.
- Collaborated with backend in agile sprints with clean PRs/tests, delivering 100% of planned scope on schedule.

Key Achievements:

- Delivered two production-ready mobile apps within the contract timeline.
- Achieved 25% responsiveness improvement across target devices.
- Launched with 0 blocking bugs and full coverage of protected features.

ExplorePulau.id

March – April 2025

Web Developer & SEO Recovery Freelance

- Rescued site from a gambling-spam hack: removed injected files and cleaned infected server.
- Hardened security and restructured the file system, improving load stability and reducing attack surface.
- Updated site architecture and destination/itinerary page layouts for maintainability and UX.
- Improved SEO visibility removed **100% of spam URLs** in Google Search Console.

Key Achievements:

- Site recovered and stabilized post-compromise.
- Rankings and indexation restored, spam URLs removed from GSC.

PROJECTS

TypeSynq Royale — Full-Stack Web3 Developer

- Built a real-time multiplayer typing battle game with WebSocket synchronization using [Multisynq](#).
- Implemented **on-chain betting and reward distribution** via smart contracts on the Monad Testnet.
- Integrated **AI-generated word themes and game settings** (word count, time limit, and word theme) based on host configuration
- Designed responsive game UI with React, TailwindCSS, and Vite, featuring smooth transitions and live player updates
- Achieved **Top 6 placement** in the official **Monad Game Hackathon**.
Tech stack: React.js, TypeScript, Vite, Multisynq, Solidity (Monad Testnet), Hardhat, Ethers.js, Wagmi,

RainbowKit, TailwindCSS, Gemini, MongoDB

Quickhire Dev — *Full-Stack Developer*

- Addressed the challenge fresh graduates face creating professional resumes by building a guided tool that produces structured, polished CVs.
- Built **step-by-step guidance** with **AI-generated suggestions** and a clean template to streamline content creation.
- Outcome: reduced CV creation time **from hours to minutes** for non-expert users.
Tech stack: React.js, Tailwind, TypeScript, Express, PostgreSQL, Heroku, Vercel

EDUCATION

Hacktiv8

Full Stack JavaScript Immersive Program

Jakarta, Indonesia

October 2024 – February 2025

Vocational High School Nurul Huda Baros

Multimedia

Serang, Indonesia

2020 – 2023

CERTIFICATION

- Cloud Practitioner Essentials | [Certificate Link](#)
- Problem Solving | [Certificate Link](#)
- SQL (Intermediate) | [Certificate Link](#)
- React.js | [Certificate Link](#)
- JavaScript (Intermediate) | [Certificate Link](#)
- Node.js (Intermediate) | [Certificate Link](#)

Skills

- **Languages** (JavaScript ES6+, TypeScript)
- **Front-End** (React.js, Next.js, React Native/Expo, Tailwind CSS, shadcn-ui, Vite, Apollo Client, Context)
- **Back-End** (Nest.js, Node.js, Express.js, Prisma ORM, Sequelize, REST APIs, GraphQL)
- **Databases** (PostgreSQL, MongoDB, Redis)
- **Real-Time** (Socket.io, Stream chat/voice/video)
- **Auth** (JWT, session management)
- **SEO & Indexing** (Google Search Console, sitemaps, JSON-LD Schema, Open Graph, metadata)
- **Cloud & Deploy** (AWS, Firebase, Cloudflare, Heroku, Vercel)
- **DevOps** (Gitflow, NGINX (basic), Docker, GitHub Actions)
- **Tools** (Git, Postman, vscode, DBeaver)
- **Testing & Quality** (Jest, unit/integration testing, linting—ESLint/Prettier, Postman)
- **Problem-Solving** (debugging, root-cause analysis, prioritization)
